EXPERIENCE

➤ Complain Management System (Web Application)

The project is aimed at creating efficient software portal for addressing the grievances of the students/faculty member for various purposes like broken furniture problem in class, microphone issues, projector problems, electricity issues, and other problem.

➤ Project Management System (Web Application)

A **project management system** is a means of **managing a project** by planning, organizing, and **managing** its different required aspects. Depending on the sophistication of the **project management system**, it can include: ... Cost control and budget **management**. Resource allocation. Quality **management**.

➤ Cafe Billing System(Web Application)

Cafe Billing System is a simple web application developed using Laravel php framework. The Project is based on the concept of generating total bills receipt of a customer. The user can view the total receipt of their items which displays receipt number and number of their food/drinks items with the total amount.

➤ Mr. Yummy (Online Food Delivery Android App)

The foremost **aim** of the **food delivery** application is to establish a business. These **apps** connect the customers with the restaurants and they can directly place the order on the **app**. Gone are the days when one had to look for pamphlets of restaurants and make a call for **ordering a food** item.

PROFESSIONAL SKILLS

- Communication
